

## The Hort Innovation Churchill Fellowship

---

**Applications open 1 February – 27 April 2018**

### What is the Hort Innovation Churchill Fellowship?

Under a new partnership with Horticulture Innovation Australia, three Churchill Fellowships, will be offered annually for the next four years (from 2017), specifically for international research on a topic related to horticulture. They will be awarded on the basis that the research undertaken will provide clear benefit to the Australian horticulture sector and, ultimately, to the wider community. The scholarships are available to anyone working in a registered levy-paying Australian horticulture business. To check that your industry is in the horticulture levy scheme visit the [Hort Innovation Website](#).

If your business isn't listed on the Hort Innovation website we still encourage you to apply for a general Churchill Fellowship.

To find out more about the Hort Innovation Churchill Fellowships or the general Fellowship please visit our website.
