# Horticulture/Landscape Award

**Award Overview**

This award recognises completed projects that show excellence in horticulture or landscape design, demonstrating outstanding horticultural skill, innovation, and contribution to the sector.

**Organisation Name**

**Project Title**

**Brief project description** (200-word max. *Please include details which explain size and complexity of project*).

**Applications must address the following criteria (maximum 150 words per section)**

## 1. Excellence in design

Tell us how your project shows excellence in design, designing with Country, horticultural practice, species selection, interpretation or landscape management that is inspirational and demonstrates best practise.

## 2. Enhancement of biodiversity and broader landscape

Explain how your project produces landscapes, plant displays or interpretation that improves, promotes and ensures positive biodiversity outcomes.

### 3. Innovation

Let us know what creative or innovative approaches and materials were used in soft and hard landscaping treatments that showcase horticultural or landscape skill and innovation.

### 4. Sustainable management and maintenance

What practices and treatments have your project included to ensure resilience, sustainable management and maintenance into the future, including water management, landscape treatment, species selection, soil health and use of resources?

## 5. Stakeholder and community engagement

What stakeholder and community engagement process did your project use throughout the design process to ensure delivery of successful outcomes?
